

## Swiss HR Analytics - Media data 2024

As the non-profit association "[Swiss HR Analytics](#)", we pursue the goal of ensuring and promoting access to knowledge and networking in the field of data analysis in human resources. We also want to promote research and the responsible use of data. We fulfil this function by regularly organising networking events ([see event archive](#)) or publishing open source information, e.g. on [ethics and data protection](#) or [studies relating to HR analytics](#).

## Visitors to the website and events

The majority of visitors to our website and events are involved in human resources. They share a keen interest in data analyses and data-based decisions in HR. They want to be part of a modern, future-orientated, digital and data-based HR ([see Executive Board and Sounding Board](#)).

## Our advertising channels for adverts

- Web: [swisshranalytics.ch](#) (over 3,000 page views per month)
- Events: 3 times a year ([see event archive](#))
